

# When you invest in a Canon FT, here's what you're getting into.

It's a lot more than just a fine-quality, professional SLR with through-the-lens spotmetering.

It's also the complete Canon system of lenses and accessories.

The FT takes more than 20 Canon breech-lock lenses. Starting with four wide-angles, including the incredible 19mm f/3.5 with perfect verticals clear to the edge. Continuing through four normals and three versatile zooms. And finishing off with six telephoto and five long telephoto lenses.

Most Canon lenses are fully automatic. And all give you the resolution and color accuracy you need.

The FT takes our complete line of accessories for specialized applications. Like our exclusive Booster, an ingenious device that amplifies through-the-lens CdS sensitivity of the FT to give you readings up to 30 full seconds at f/1.8 on ASA 100 film.

Want a camera that'll get you the system you need? Check a franchised Bell & Howell/Canon dealer.

Get what's coming to you. You can with a Canon.

## Canon

Canon Cameras, made in Tokyo, Japan by the Canon Camera Co., are exclusively sold, serviced and guaranteed throughout the U.S. and Canada by Bell & Howell.
